Camrose Result Anticipated

C. A. Ronning, provincial government candidate, has been elected member for Camrose on the second count by a majority of 400 over his Liberal opponent.

Premier Brownlee has expressed gratification over the U.F.A. victory though scrutiny of the vote reveals a marked falling off in government support. The U.F.A. vote suffered a decline of about 600 as compared with the party's total in the 1930 election. At the general election the U.F.A. voters numbered 3,137 while the Liberal opponent polled 2,036 votes. In the present contest the two anti-government candidates received over 3,000 votes.

This result shows that the entrance of a Conservative candidate in the fight assured the election of the government nominee and explains the failure of the Liberal to win the seat. The vote also indicated what was claimed some time ago that the Conservative standard bearer never had a chance of carrying the riding and that his presence in the field was a tactical mistake of the first order. The best he could do in first choice votes was but slightly over the thousand mark.

Camrose has given another minority candidate to the government ranks in the legislature. It has also put a definite check to any movement toward fusion of antigovernment forces in this province. For this result, the Conservative leader must be held largely responsible. The Conservative did not place a candidate in the field in the riding in the general election two years ago. On that occasion the present Liberal candidate made a surprisingly strong run against a popular member of the Brownlee cabinet. All signs pointed to Mr. Westwick's election in the by-election in a straight fight. Does this explain the Conservative move?

The result in Camrose is a moral victory for the Liberals. In by-elections any government that is strongly entrenched in office has a marked advantage over the opposition in that a constituency wants to stand in with the administration in the lively expectation of possible favors. In this instance, the government held a trump card in the Camrose Normal School which has been kept open after a previous announcement by the premier that it would be closed as an economy measure. To have held their former vote under those conditions and against two opponents was a considerable Liberal achievement.

The futile intervention of the Conservative party in the riding will assurely complicate the situation in the forthcoming Calgary election. Having refused to stay out of the field in Camrose, Mr. Duggan and his lieutenants can hardly expect Liberal support for their candidate in the city or in any other riding for some time to come. Under the circumstances perhaps the Brownlee government is entitled to feel highly satisfied over the Camrose contest.

Come to the Annual Armistice Dance in the Adelphi Hotel on Thursday, November 10th, for a good time. Good floor, Good Music by the Star 5-piece Dance Orchestra and Good refreshments. Card tables will be provided for non-dancers. Tickets 75c.; Spectators 50c. Proceeds in aid of maintenance of Park.

TOWN OF LACOMBE

Tenders will be received by the undersigned up to noon on Tuesday, November 15th, 1932, for the purchase of a dwelling house situate on lot 7, Block 12, Plan 1A, known as the Parkby house, Manton Street. Full particulars at Town Office. Highest or any tender not necessarily accepted. Tenders dispatched through the mail should be marked "Tenders for Dwelling House."

Lewis P. Minkler,
Secretary-Treasurer

Only Way to Reduce Taxes

The Citizens' Research Institute of Canada has issued a statement dealing with municipal taxation. Attention is called to the serious increase in tax arrears in many Canadian municipalities and to the possibility that they will be even larger at the end of 1931, a clear indication that the tax burden has become greater than many taxpayers can bear.

In 1913, according to information compiled, by the Institute, the cost of municipal services throughout Canada amounted to $11.96 per capita. By 1930, the latest complete information available, municipal taxation reached $27.56 per capita. It is probably considerably higher this year. The trend of municipal taxation is out of step with this trend in the cost of living.

The figures emphasize the fact that expenditures must be reduced to income proportions even as they must be in the case of individuals and private corporations, if municipalities are to remain solvent. It is a case of having to live within the available means. The institute advises against reducing expenditures in a haphazard, hysterical fashion, but only after a careful appraisal of all essential services. There should be a thorough scrutiny of the costs of education, health and sanitation, police and fire protection streets and public buildings, parks and other civil services.

There is only one way to reduce the municipal tax burden and that is to cut down municipal expenditures. It is important, therefore, in the coming civic elections to elect only candidates pledged to the programme of sane econowy. —Herald

UNEMPLOYED CHURCH PEWS ONE OF TODAY'S PROBLEMS

—By William T. Ellis

One of the serious unemployment problems of our day is that of unemployed church pews. Here they are is abundance; comfortable, competent pews, each a potential asset to our common life, but unemployed because unoccupied.

Money, brains and devotion went into the making of them. They were designed for a great mission. It was purposed that they should provide rest and worship and spiritual inspiration and brotherly fellowship for soul-hungry men and women.

These pews were intended to be a meeting place for men and his Maker.

While seated in them, men and women would worship in fellowship and hear the everlasting word that is life.

So these pews were meant to be vital factors in community life. They should have a high place in the economy of society.

But, alas. Many of the pews are empty, Sunday after Sunday. They are not employed, not earning their keep. They are a charge upon the churches and a serious reflection upon the symmetrical working of our civilization.

Every empty pew is somebody's missed opportunity.

Life would be very different today for many persons who should have been in these pews Sunday after Sunday, but have been absent, had they been true to their opportunities. Nobody can reckon the spiritual values which the absentees have missed—values of comfort, of recreation of the spirit's powers, of peace, of higher wisdom, of glimpses of the divine, of a sense of solidarity with the friends of God.

There is intellectual stimulus, also, to be found in this new unemployed pew. Therein are to be heard thoughtful discussions of the most important subjects that ever enriched or taxed the mind of man.

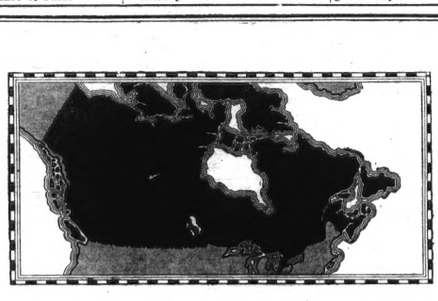

In these pews there is room for whole families. There would be less of a "younger generation" problem today if fathers and mothers had followed their parents usage of taking their sons and daughters regularly to church.

STRANGE ACCIDENT

On Friday evening about six o'clock, Jens Eric Thorsen, seventeen-year-old son of Mr. and Mrs. L. Christian Thorsen of Markerville met with a serious accident.

He had taken a twenty-two rifle from the house and gone out to shoot a pup in the yard. He hit the dog but did not kill it, he again loaded the rifle and the dog started to go over a fence, the young man taking the gun by the barrel struck the dog across the head and the gun went off, the bullet entering the body in the lower abdominal region and passing through the intestines lodged in the hip bone.

The W.A. of St. Cyprian's Church are holding their annual Sale of Work and Tea on Saturday afternoon, November 26th in the Odd Fellows Hall. A fruit cake to be given away.

Closely Identified with the Financial Life of Canada for 115 Years

1817 1932

From its founding early in the last century, the **Bank of Montreal** has been closely identified with all phases of the agricultural, industrial, commercial and financial life of Canada.

It has had wide experience in the banking requirements of Canadian business from coast to coast.

On account of its large resources, its national, provincial and local organizations, the Bank of Montreal is always in a position to discuss banking requirements and is always glad to do so.

Their Efforts Appreciated

The sale of poppies last Saturday did not realize as much as usual, still was very satisfactory considering the year. The money paid for the Vetcraft poppies goes to soldiers who have not the health and strength for harder work and the profits go to the Soldiers' ward at the University Hospital, Edmonton and the Colonel Belcher Hospital, Calgary.

It may interest the public to know how the money was spent last year. At the University Hospital, the Matron advised that bedroom slippers were needed, and so slippers of assorted sizes were bought, and both patients and nurses have testified their appreciation.

The Matron of the Belcher Hospital reported that they had many transient out-door patients, who often needed little comforts for which the hospital had no fund, for instance: underwear, socks, shirts, etc., were in many cases more necessary than medicine. The matron sent the Club an itemized account with receipts of her expenditure. In each case the Regimental number and name of the Soldier accompanied the vouchers—several had a shave, others both a hair cut and a shave in addition to garments. The Lest We Forget Club feel thankful to be able in this small way to make life easier for these men and help thus to do something in the work of reconstruction.

Alix News

Dr. Powell lectured on Monday evening in the church on "Success" in a masterly way. June Ray sang beautifully as did the choir in two anthems. Mrs. Upton and Mr. A. C. McNair delighted the audience with a sacred duet.

A quiet wedding was solemnized at the parsonage of the United Church, Mirror, on Sunday afternoon, October 30th, when Mr. Carl Venon Neis, of Mirror and Miss Edna Minkler, of Lacombe were united in marriage, Rev. R. Upton performing the ceremony.

Responding to complaints from farmers south of town, that thieves were raiding their premises, Constable Marks and two other police from Red Deer have been scouring the country in search of the marauders but to date we have not heard of an arrest. Nevertheless, we understand the names of the thieves are in the hands of the police and it is only a matter of time until they are gathered in. A quantity of the loot has been recovered.

Thursday night of last week around 8:30, fire starting near the chimney, destroyed the residence on the farm of Mr. and Mrs. F. G. Morgan north of town, making a complete job of the house and the greater part of the contents. The residence was insured, but not the effects. The loss is a hard blow to the family. We understand they have moved into the old Yeburgh house until a new one can be erected to replace the one burned.

WHY THEY RIOTED

One of the weaknesses of democracy is what a man in command of figures can so manipulate them that he can make less well informed people believe almost anything. The man in the street is by his very nature and position cursed with a tremendous capacity for being gulled by those who possess very slightly superior knowledge.

It is an axiom that truth has many facets, but what is not so often admitted is that clever arrangements of data can place any one of these facts into such an advantageous light that even the existence of others is forgotten.

Take a group of normally intelligent, normally badly educated, normally loose thinking people, and place two speakers before them—say, for example, one from the British National Government and one from the Independent Labor Party. It would be perfectly safe to wager that each could present the issues of the last British general election in such a manner as to prove conclusively to these people that his particular side was wholly justified in its stand.

In other words, the normally intelligent, normally loose thinking person dare not trust implicitly in anything that is explained to him by anyone who has a more comprehsive command of facts. That is why majorities are not notoriously reliable.

At present moment the "means test" is very much to the fore. It was primarily because of the "means test" and 'transitional relief' that the march to London and subsequent riots took place. How far were the grievances of the marchers justified? Their grievances really date from the advent of the National Government, following submission of the May Report. "Transitional Relief" is relief paid after the 26 weeks have elapsed during which—by the British contributory insurance plan— workers who have lost their jobs are eligible for unemployment insurance benefits. After the 26 weeks have elapsed, they cease to be recipients of insurance benefits and become state supported indigents. Their application for this sort of relief is referred to a local committee, which utilizes the machinery of the poor law. This is called the "means test."

Following institution of "transitional relief" and the 'means test,' innumerable abuses of the dole system were uncovered. Expenditures were cut down, the budget balanced and conspiracies to rob the State by claiming unwarranted relief virtually eliminated. Thus the National Government seems to have done a fine piece of work, to have tightened up relief qualifications without penalizing the deserving. So why should these fellows march to London and riot. But wait a moment.

The unemployed claim that a harsh and unreasonable method of inquiry is in existence. They say that the ministry of labor is taking authority out of the hands of the local committees in every case where the slightest tendency toward generosity is shown. They maintain that the benefits are being harshly slashed, without reference to human needs; that they are forced to sell everything they possess before they are permitted to draw this relief and that the earnings of relatives are now taken into account before relief is granted. In other words, if a man has a job and six relatives out of work, none of them may be granted relief until he has impoverished himself trying to help them out of his own salary.

So why shouldn't they march to London, and why shouldn't they riot?

Until we are in full possession of the true facts, we have to rely upon our natural inclinations as to which of these facts of truth we shall look at.

Spruceville News

The large crowd which packed the hall at the Chicken Supper last Friday night again proved the popularity of this annual event. The dance floor was also crowded. All were pleased that the supper was such a decided success and everyone had a splendid time.

The evening meeting of the U.F.A. and U.F.W.A. will be held on Friday, November 11th instead of Tuesday night.

We regret to report that Joe Stout is still on the sick list, and hope we will see him around again soon.

The afternoon meeting of the U.F.W.A. will be held at the home of Mrs. Proudfoot on Wednesday, Nov. 16th. The meeting will be more of a social afternoon with music,etc.

A dance will be held in the hall on Friday, November 18th in aid of the school fair. Good music. Come and enjoy yourselves.

We are glad to hear that Mr. James Reid is around again after his sickness, last week.

UNITED CHURCH NOTES

The United Church Congregational social held Friday evening last was well attended and much enjoyed. Splendid entertainment was provided by local musical artists and contests and games also kept the crowd in a merry mood. St. Andrew's talented choir leader, L. D. Wright, delighted his audience with a reading and with several instrumental pieces played by his orchestra, composed of Walter Taylor, Harry Wright and Robert Layton.

Soloists, whose offerings were also much appreciated were Mrs. T. Wilkes, T. Wilkes, R. Rhind and Victor Wright. A nice feature of the program too was the community singing led by T. Wilkes.

Announcement was made by Mr. Wright, of a concert to be put on by the Senior and Junior choirs on Thursday, November 17th, which he promises will meet with everyone's expectations in the way of amusement. Mrs. F. H. Reed will be Choral Accompanist and Mr. Wright, Musical Director. The Lacombe Concert Orchestara will also assist. Admission 35c.

Remembrance Day

On Remembrance Day, November 11th the Canadian Legion and Lest We Forget Club of Lacombe will pay homage to their dead at the Cenotaph in the Memorial Park. Service to begin punctually at a quarter to eleven o'clock in the morning the Rev. R. B. Layton, presiding. All organizations and citizens are invited to attend.

Interesting Town News

The United Service of the Churches in Commemoration of the Armistice will be held in St. Andrew's Church on Sunday, November 13th, at 7:30 p.m.

The general business meeting of the Lest We Forget Club will be held in the Town Hall on Wednesday, November 16th at 8 p.m.

Miss Griffiths, Secretary for Young People of the United Church in Canada, was an interesting speaker at the combined Thankoffering meeting of the Lacombe Missionary Society, the Young Women's Auxiliary and the Senior C.G.I.T. groups. Miss Griffiths held the attention of her audience as she drew a comparison of present times with the days of Jesus, in the struggle for existence, the strife between nations, etc., and emphasized the necessity of Canadians living a brand of Christianity which will bear the searching criticism of Oriental peoples and be welcomed by them as the true faith. The Scripture lesson was read by Mrs. Lamont and Mi s Jagoe expressed the appreciation of the gathering to Miss Griffiths for her splendid message. Solos by Mrs. John MacDonald and Mrs. T. Wilkes were much enjoyed. A short after meeting of C.G.I.T. girls and their leaders was held at which Miss Griffiths gave much helpful information. Total thankoffering amounted to $40.57.

A most informative and interesting paper on Canadian Industries with particular reference to those of our own Province was given by Mrs. Ray Saunders at the regular meeting of the Women's Institute held at the home of Mrs. C. E. Todd on Saturday. Following this paper there was a discussion on the advantages and disadvantages of "Buying Alberta Products", which brought to light some interesting viewpoints on this topic. Current events were given by Mrs. A. French. Mrs. T. Roberts and Mrs. W. Newton were appointed a committee to pick out a suitable book for study at future meetings. Special attention was called to the Handicraft Exhibit which is to be a feature of the annual convention of the Alberta Women's Institutes in Calgary next May. The rewards will be mostly ribbon awards, with the exception of darning and patching, which will have small money prizes. There will also be a special prize for the institute receiving the largest number of points.

The classes are as follows: Rugs, Hooked or crocheted, new and old material; braided or any other kind

Quits, patchwork, quilted or tied.

Weaving, any hand woven article.

Lace, Irish crochet, tatting, filet and knitted. Embroidery: Crewel, white stamped and original samplers.

Darning on Stockings. Patching on cotton, wool or silk. Quilt made by W.I. members.

Flour sacks made into household articles, clothing. These will be judged for originality, usefulness, suitability and workmanship.

Knitting: Wool socks and wool gloves. Handiwork by new Canadians featuring national type of needle work.

All exhibits must be the work of the exhibitor and done within this current year.

At the Avalon

"The Man Who Played God" is a story of a musician of international fame, an essentially human being whose life and happiness revolves around his music and the pleasure he brings to countless thousands via the Heaven-sent gift he possesses. Fate plays tricks on him, giving and taking love, presenting the world for a plaything and then taking everything away. George Arliss portrays every step in the drama with nuances and shadings rarely seen on the screen.

He is loved by two women, adored by thousands more. He was in love with one, a widow, played by Violet Heming, before she married another. She loves him but keeps her own council because she believes him to be in love with a young and beautiful girl, played by lovely Bette Davis a newcomer to the screen whose work has been rewarded with a long term contract.

COMING: James Cagney in "The Crowd Roars," Nov. 17, 18 and 19.

4 Marx Brothers, "Horse Feathers," Nov. 24, 25 and 26.

Fortune Cup Inn, located in the Central Garage Building, Barnett Ave, besides serving afternoon teas and lunches in the evening, are prepared to take orders for cakes and other home cooking. Try their cakes and pastries—they are good.

ORANGE PEKOE BLEND
"SALADA" TEA
"Fresh from the Gardens"

What The Census Tells.

Statistics are generally regarded as dry and uninteresting, but to those who make a study of them as they relate to matters of vital importance to the welfare of the human family they become of absorbing interest. In fact, a knowledge and understanding of the statistical position of many matters are essential to a true grasp of such matters, and where it is possible to present such information to people in the form of charts and graphs they tell a story which mere words could never convey.

Within recent months the Dominion Bureau of Statistics, which, by the way, is one of the best organized and most efficient departments of the Ottawa public service, has issued a large number of bulletins presenting the facts ascertained in the decennial census-taking last year, and which are worthy of study and consideration by the Canadian people. They indicate what progress has been made, where it has been made, and wherein as a people we have slipped a bit backward, or remained stationary.

Some things stand out as worthy of note. We learn, for example, that Canada's population increased by 1,588,837 in the ten year period, 1921-31, or slightly over 18 per cent., which is 2 per cent. higher than the United States, a very healthy and substantial growth, and that the four Western provinces continued proportionately to increase in numbers more rapidly than the five Eastern provinces. Not so satisfactory from the standpoint of the nation as a whole is the disclosure that whereas the population of our cities, towns and villages increased by 1,219,936, or 28 per cent., our rural population only increased by 368,901, or slightly over 8 per cent., with the result that whereas our rural population in 1921 exceeded the urban by 83,-000, the urban now exceeds the rural by over 767,000.

It is interesting, too, to learn that of Canada's total population of 10,-376,786, no less than 8,069,258, or 77⅞ per cent., are native born Canadians, while a further 1,184,830, or 11⅓ per cent., were born elsewhere under the British flag, leaving less than 11 per cent. of other than British birth.

Classified by religious denominations, the fact emerges that Roman Catholics constitute the largest single denomination with 4,098,546 adherents, the United Church coming second with 2,016,897, Anglicans third with 1,-635,321, and Presbyterians fourth with 870,482. Not one of the remaining 27 denominations listed reach 500,000.

Canada's population consists of 5,374,541 males and 5,002,245 females, and the number of males predominate in every one of the nine provinces. There are, of course, more single than married persons, because of the large number of children, but the percentage of single to married is steadily decreasing, single persons constituting only 57.35 per cent. of the population in 1931, as compared with 61.67 per cent. in 1901, while married persons increased from 34.13 per cent. in 1901. to 38.27 per cent. in 1931. The number of widowed remained about the same, but the number of divorced rose from 661, or .01 per cent. in 1901, to 7,441 or .07 per cent. in 1931.

When we turn to the bulletin on the literacy of the people, a most encouraging picture is presented. It shows that a steadily increasing percentage of our people five years of age and over can both read and write, and taking Canada as a whole no less than 92.34 per cent. can do so compared with 90.00 per cent. only ten years ago. That this progress will be continued is made evident by the statistics of school attendance which reveals the encouraging fact that, whereas the increase in population between the ages of 5 and 24 years in the ten year period, 1921-1931, was 19.60 per cent., the percentage increase at school was 25.82 per cent. Better than one out of every five persons living in Canada is attending school.

Analysing the economic position so far as agriculture is concerned, it is revealed that, were it not for substantial increases in many departments in the three prairie provinces, Canada would have had to report a decided slipping back during the past ten years. There are, for example, 336,000 fewer horses on Canadian farms than in 1921, but this is accounted for by the introduction of automobiles and tractors. The number of cows in calf or in milk only increased by 261,000, and actually decreased in the Maritime provinces; other cattle were fewer in number by 642,000, every province except Quebec and British Columbia reporting decreases; sheep increased by 422,-000, but again decreases took place in all provinces east of the Ottawa River; swine, on the other hand, showed the substantial increase of 1,343,000, only Nova Scotia and Ontario reporting small decreases; poultry jumped over 288,375,000 with all provinces sharing in the gain.

The number of farms in Canada is greater by 17,574 than ten years ago, there being fewer in the east and more in the west. Farms are also becoming larger, the average size in 1931 being 224 acres as compared with 198 acres in 1921. The acreage in occupied farms increased by 22,680,000 acres, while improved land in these occupied farms rose by over 15,000,000 acres.

On the other hand, the value of farm lands decreased by $984,409,709 and farm buildings by $41,171,300, all provinces reporting drops in land values, and the eastern provinces, except Prince Edward Island, decreases in value of buildings, while Saskatchewan, Alberta and British Columbia reported increases.

There was, however, a marked improvement in farm comforts, conveniences and equipment, including automobiles, machinery of various kinds, gas and electric light, radios, telephones, water piped into farm homes, improvement in roads, and shortening of distances to market and railway towns.

Radio For North

Mining Man Appointed Supervisor For the Nelson Area

W. J. Young, veteran mining man, and promotor of northern developments, has been named radio supervisor for Nelson area lying north of The Pas, and including the town, it was learned from Ottawa despatches.

Mr. Young's duties will include supervision of all radio equipment in The Pas, Sherridon, Fifth Flon and points on the Hudson Bay railway, including the new port of Churchill.

Mr. Young is the first supervisor appointed in the Nelson area. The appointment was made by the department of marine, Ottawa. In the past radio supervision has been carried out by the members of the Royal Canadian Mounted Police in this district.

The man who says the right thing at the right time is rare. But not half so rare as the man who says nothing at the right time.

Japan's proposed five-year public works program calls for an expenditure of over $100,000,000.

The German Peril

Policy Of Disarmament Only Means Of Averting War

Germany is the most dangerous element in Europe. In international affairs she will go bludging through as she has always gone. In spite of her unfortunate manner, she must not be given the sense of isolation, especially by Great Britain. She must be cultivated assiduously and friendship maintained. Let us, however, not forget or ignore the facts in our negligent English way. Our own opinion is that unless the Great Powers adopt a policy of real disarmament within the next twelve months, thrusting aside all legal quibbles, the relations of Germany will grow rapidly worse and we shall head towards another world war.—Everyman, London.

Tests indicate that canned salmon contains 60 to 80 per cent. as much vitamin "D" as is found in cod liver oil.

People of Britain spent $12,500,000 on patent medicines in the last 12 months.

Troubled With Her Children Having Summer Complaint

Mrs. L. E. Montgomery, Ave. K. South, Saskatoon, Sask., writes:—"I am the mother of two children and have a great deal of trouble with them having summer complaint, in fact, several times every Summer they were subject to attacks.

"I have found Dr. Fowler's Extract of Wild Strawberry to be the most effective remedy and keep it always handy and give it immediately on the first sign of any bowel complaint.

"Thanks to 'Dr. Fowler's' I no longer dread the Summer months."

A Lost Island

Scientists Searching For Tiny Dot Of Land In the Pacific

Sarah Ann, much to the consternation of the astronomical world, has disappeared and, it is feared, drowned. Just a pin-point freckle on the broad face of the Pacific, Sarah Ann was—and maybe is—the tiniest sort of an uninhabited island.

This Cinderella of the sea was last reported alive some 15 years ago. Then of no value to anyone and avoided by ship captains, she has become today a spot of great importance. If she can be located, many scientists want a date five years from now.

The reason for the sudden popularity arises from efforts to calculate the course of the 1937 eclipse.

It has been found that on June 28, 1937, the sun will be eclipsed totally by the moon for about seven minutes. In all the Pacific, Sarah Ann was the only reported spot of land suitable for observation in the 5,000-mile long, 120-mile wide band of totality.

Unless Sarah Ann can be found, it is possible a coral reef may be built up to island status for the seven minutes.

HER HAND FELT DEAD

Helpless With Rheumatism

At one time she thought she would lose the use of her right hand. But "a blessing"—in the form of Kruschen Salts—put her right again.

"I was sure in a bad state," she writes, "In fact, I could not do my housework, I was so bad with rheumatism in my arms and hands. I could not sleep at nights, and had to get up and heat water to ease my pain and numbness. I took all kinds of medicines. I rubbed it and plastered it—but it was still there. I thought I would lose the use of my right hand. I could not hold anything, nor could I sew a button on. My arm would go dead. I was advised to try Kruschen, and inside of three weeks I found such a change. I have kept on taking it, and am so thankful for the blessings I have received in Kruschen. Now I sleep all night — thanks to Kruschen's help and relief."
—(Mrs.) J. H.

The six salts in Kruschen stimulate the liver and kidneys to healthy, regular action; assist them to get rid of the excess uric acid which is the cause of all rheumatic suffering. When poisonous uric acid goes—with its deposits of needle-pointed crystals—there's no doubt about those aches and pains going too!

A Retarding Influence

Rigid Economy When Not Necessary Does Much Harm

All over the province the high schools and collegiate institutes are trying to cut down expenses. In fact all over the province everybody is trying to cut down expenses, even those who have no reason at all for doing so. People who have their 1928 income are pinching like the rest. This reducing of expenses, this refraining from buying anything that can be done without retards the return of business activity. And yet a force like this operates inevitably and no argument can prevail against it.—Toronto Star.

Ready-Made Medicine.—You need no physician for ordinary ills when you have at hand a bottle of Dr. Thomas' Eclectric Oil. For coughs, colds, sore throat, bronchial troubles, it is invaluable; for scalds, burns, bruises, sprains it is unsurpassed; while for cuts, sores and the like it is an unquestionable healer. It needs no testimonial other than the use, and that will satisfy anyone as to its effectiveness.

Hint For the Housewife

Easy Way To Liquify Jam That Has Hardened

If jam left from a previous season has become hard and sugary it need not be thrown away or reserved exclusively for cooking purposes. Fill a large earthenware bowl with cold water, and, after removing the jam-pot covers, stand the pots in the cold water, placing the bowl in a fairly hot oven After a time the jam will become liquid, and when it has cooled down it will be found that no hard lumps of sugar remain and the jam is as delicious as ever.

Will Try Again

When the sunken "Bright Fan's" crew was landed at Churchill, Bertram Barker, 41, prospector, said he intended to make another try and get to Britain via the Hudson Bay route. He was on the "Bright Fan" when it hit an iceberg.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Graves' Worm Exterminator.

Employer: "I'll give you a position as clerk to start with, and pay you what you are worth. Is that satisfactory?"

Recent College Graduate: "Oh, certainly, but—er—do you think you could afford it?"

A new British military airplane is provided with a revolving, transparent turret where the gunner may sit protected from the wind as he takes aim.

Silk is considered unclean by the Mohammedans because it is the product of a worm.

Wood can now be sliced into sheets one one-hundredth of an inch thick.

Testing Wheat Samples

Meeting Held In Winnipeg Of National Research Council

The question of testing samples of hard red spring wheats, received for exhibition at the World Grain Exhibition to be held at Regina next year, was dealt with at the annual meeting of the associate committee on grain research of the National Research Council held in Winnipeg.

L. H. Newman, Dominion cerealist and chairman of the awards committee of the world show, introduced the question. After full discussion, it was decided milling and baking tests need only be applied to the limited number of exhibits remaining after other recognized methods of judging had been applied.

Various technical reports were delivered at the final session of the annual meeting and it was decided to meet in Winnipeg again in April, 1933.

Strange Survival Of Seeds

Flowers Grow First Year After Woodlands Are Cut

In this country and doubtless in others as well, whenever a wood on a hillside is cut down the following year that hillside is one blaze of foxgloves, though none was visible or existing when the wood was standing. When, as during the war, large woodlands were cut down the blaze of color, extending sometimes for miles, was a fine sight. Now comes the strange part. After so fine a crop of foxgloves one would expect a still finer crop the following year, but no, the succeeding year the crop is not more than half and in about half a dozen years they disappear altogether. Where do the original seeds come from? Have they lain dormant for a few centuries?—J. H. Howell in the London Times.

Persian Balm—alluring, provocative and charming. Fragrant and refreshing as a cool breeze in summer. Delightful to use. Creates complexions of surpassing loveliness. Makes the skin velvety soft in texture. Soothes and dispels all irritations caused by weather conditions. Softens and whitens the hands. Persian Balm is a peerless toilet requisite for women who care for charm and distinction. Use it for hands and face.

Skeleton Of Soldier Found In Quebec

Believed To Have Been In Ground Since 1653

A skeleton believed to be that of a young French soldier killed while defending the city against an Iroquois attack on August 23, 1653, has been unearthed by workmen excavating in the heart of Old Three Rivers.

A brass platter, a leather-covered sabre sheath bearing the soldier's regiment number, a container made of bark and some small pieces of cloth were found near the bones.

Pigeon Racing Popular

An idea of the popularity of pigeon racing in Great Britain can be gathered from the fact that there are 10,-000,000 trained homing pigeons in the country and prize-money amounts to $1,250,000 annually. During one season each of the four British railways groups will carry about 2,500,000 pigeons in special coacheus to various parts of the country for liberation.

Dread Of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are warded off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

Bore—"That air always carries me away when I hear it."

Listener-by—"I'll have them play it again for you."

Great Britain consumes one cup of cocoa a week per capita.

Saskatchewan Wheat Yield

Estimate Of Pool Elevators Places Crop At 204,282,000 Bushels

Based on reports of 1,044 of its agents throughout the province, Saskatchewan Pool Elevators, Limited, offered its estimate of the 1932 Saskatchewan wheat crop. The figure is 204,282,000 bushels.

This is substantially lower than the estimates of any other agency so far made public. It is over 13,000,000 bushels below the Winnipeg Free Press estimate for Saskatchewan, published on September 7, and 23,000,-000 bushels below that of the Dominion Bureau of Statistics, published on September 10.

The figure represents an estimate of wheat which will actually be delivered to country elevators in the province or loaded over the platform and in addition is included an allowance for back to farmers for seed, feed and other purposes.

Taking the Dominion Bureau of Statistics' estimate of 1932 acreage seeded to wheat in Saskatchewan, which is 15,543,000 acres (a figure used by other agencies), the yield per acre works out at 13.14 bushels.

As this production was made by more than 1,000 experienced observers after threshing was completed for the most part, the company believes that the opportunity for maximum accuracy was excellent. It considers, further, that the new figure bears out a wide-spread opinion that threshing returns in the province were not coming up to harvest expectations. The view that wheat production would prove lower than formerly anticipated, is confirmed in the present report.

The Pool elevators organization confirms its estimate to Saskatchewan.

Settlers Going North To Hard Conditions

Four Thousand Have Already Reached Fifty-Seventh Parallel

Two post offices have increased to eleven in two years around Notikewin, on the 57th parallel in northern Alberta. Rev. Harry E. Parker, a Winnipeg boy, who left postgraduate studies at Chicago to go pioneering there for the United Church in 1930, reported signs of growth and of need. Sixty-five miles from a railway, Notikewin today has two large stores, two restaurants, a pool room, a hardware store, large warehouses, a Roman Catholic Church and a United Church and manse. There was no village when Mr. Parker arrived.

In 1930 there were 400 people in the district, today 4,000, and the Sky Pilot is serving regularly 800 square miles, besides making one trip over the muskeg in winter to the Keg and Paddle River Prairies. Up there, says the missionary, is the real north where millions of acres await the plow.

Many of the families around Notikewin have nothing but ground wheat and potatoes to eat for months. He has found family after family almost naked. Their houses are of logs with pole and sod roofs.

There are Russians, Hungarians, Scandinavians, Poles, Americans, English, Irish, Scots and Canadians. There are the poorest European peasants and university graduates, all trying to carve out homes. If they arrive too late to raise garden stuff, they almost starve before spring. Some came in during September by covered wagon.

The missionary says he will need much clothing for these people this winter.

Many Uses For X-Ray

Unlimited Possibilities Are Seen By Detroit Physician

A Detroit physician with a flair for experimentation claims that he can glimpse the world of to-morrow through his X-ray machine.

Dr. Wie Kim Lim, a native of the island of Sumatra, spends most of his spare time gazing into the fluoroscope at various objects his fancy prompts him to place under the X-ray.

As a result of his experiments, he predicts the following:

That some day bank clerks will use the X-ray to detect fake money.

That scientists will use the X-ray to diagnose plant as well as animal diseases.

That manufacturers will X-ray alloys to be used in aeroplanes to detect flaws in the metal and thereby safeguard flying.

Landscapes Take Time

Landscape architecture which will require 25 years to complete is being undertaken at Western University, London, Ontario. It is a reminder that landscapes are not made in a week or a month, although a few vandals with axes and saws can do much to destroy one in a single day.

"A very handsome woman, that Mrs. Miller."

"You ought to have seen her fifteen or twenty years ago, when she was ten years younger."

Client: "What effect will your new scalp treatment have on my hair?"

Hairdresser: "Oh, I think it will come out all right."

The United Kingdom now leads the world in importing American talkies.

New Type Of Sugar Beet

Disease-Resistant Beet Expected To Increase Production

Development of a disease-resistant sugar beet designed to increase production and effect large savings to growers was announced by the U.S. Department of Agriculture.

The new beet, produced by department experts, has been definitely proved more resistant to the curly-top disease than the variety imported from Germany and produced in large quantities in the west. An extensive programme of seed production is now in progress at department stations.

Tests conducted on the new product in California, Idaho, Utah, Colorado and New Mexico showed a yield of from 12 to 18 tons per acre against 7 to 14 tons for the ordinary commercial varieties, the department said.

The new beet produced from 4,189 to 6,185 pounds gross sugar per acre, the commercial types from 2,755 to 4,738 pounds.

"My husband says it's my prettiest dress"

"I want to tell you how I got acquainted with Diamond Tints," says a cordial letter from a Windsor woman. "I was in the drug store and saw some attractive Diamond Tint packages. The druggist told me they were for tinting light shades without boiling. He said they were made by the Diamond Dyes people. I have always used Diamond Dyes for dyeing dark colours and know they are the best dyes made. When I saw Diamond Tints I thought of a 2-year old dress which I had to quit wearing because it was so faded. I got a package and gave my dress the simple rinsing called for. It came out the loveliest shade—a lustrous, shimmering yellow. I have laundered it several times but have never had to retint. It certainly holds the colour. I'm perfectly delighted with my new dress, as I call it, and my husband says it's the prettiest one I have."

DIAMOND TINTS
AT ALL DRUG STORES

Will Hurt U.S. Trade

Economic Conference Agreements Will Affect American Exports

Export of food products from the United States to the United Kingdom will probably be affected to the tune of $130,736,065 annually by the agreements reached at the Imperial Economic Conference between the United Kingdom and the Dominions, says the Journal of Commerce, New York.

Pointing out the effect of the agreements on United States products is problematical and probably impossible to forecast with any degree of certainty. The paper states a compilation of export values of the foodstuffs affected for the past five years led to the above valuation.

One Little Incident

Easy To Understand Why Prince Of Wales Is Popular

An article in the Christian Science Monitor says the Prince of Wales has replaced one retiring Scilly Island farmer with two unemployed Welsh miners and has sent an expert from his Duchy of Cornwall to teach them the intricacies of agriculture. Meanwhile, since they have been taken off the dole, he is paying them from his own pocket until their first crops are harvested. It is little incidents like this one that continue to send our estimate of His Royal Highness still higher.

Many children die from the assaults of worms, and the first care of mothers should be to see that their infants are free from these pests. A vermifuge that can be depended on is Miller's Worm Powders. They will not only expel worms from the system, but act as a health-giving medicine and a remedy for many of the ailments that beset infants, enfeebling them and endangering their lives.

Cutting the Cost

Mrs. Sharpe—"The twins are going to cost us a lot of money to educate."

Mr. Sharpe—"Well, let's send one to school in the morning, and one in the afternoon and only pay for one."

Don't be without Douglas' Egyptian Liniment. Keep it always handy. Relieves toothache, neuralgia, sore throat, quinsy, and croup. Invaluable for burns, sores, Barber's Itch and Ringworm.

A Good British Joke

The London Humorist is responsible for this: A burst water pipe in Madrid caused a flood in one of the principal streets. More trouble with the Spanish Main.

Kilmainham, Kilkenny and Dundalk prisons in the Irish Free State have just been closed.

Coal smoke has done nearly $300,-000,000 damage to English buildings in the last 25 years.

Steam Engine For Aeroplane

New Type Of Flying Machine To Be Tested

Harold C. Johnston, proprietor of an Akron, Ohio, welding shop, opened the doors of his small plant and disclosed a steam aeroplane engine which he tuned up to 1,500 revolutions per minute.

Johnston a builder of his own aeroplane designs, said he had spent nine months in developing the engine after a "plane accident more than a year ago had caused him to seek a way of eliminating the fire hazard in aviation.

Weighing only 168 pounds, exclusive of the propellor, the engine will develop 62 horse-power.

The engine is to be installed within a few weeks in a small plane and flown to the Pacific Coast.

No Change In Regulations

Law Governing Big Game Shooting In Saskatchewan the Same As Last Year

Regulations governing the shooting of big game in Saskatchewan remain the same this year as last year.

The season opens on November 15 and continues to December 14. Bag limit is one moose or one caribou and one deer, or two deer. With the exception of caribou, only males are to be shot.

Apple Crop Is Less

A decrease of 17 per cent. from the final estimate for 1931 is indicated in Canada's commercial apple crop for this year, according to a report issued recently from the office of the Dominion Fruit Commissioner. The 1932 estimate is 3,157,300 barrels, as against 3,793,052 barrels last year.

France has further increased the proportion of foreign wheat in flour.

"Is this a one-piece bathing suit?"

"Yes, madam, count it."

CAN YOU ANSWER THESE QUESTIONS ABOUT BABY?

Why does a baby cry at night? How much should he weigh? When should he creep—walk—talk? How much food does he need? What makes him, too thin—fat? You will find helpful answers to many questions about baby in "Baby Welfare." Write today for your copy. Use coupon below.

Unprofitable Practices Followed On Farms Causes Heavy Losses Which Could Easily Be Avoided

While many unprofitable practices are followed on farms throughout the country there would appear to be three that are outstanding that should long ago have been corrected, observes J. B. Spencer, Director of Publicity, Department of Agriculture, Ottawa. These practices are the thick sowing of corn for a fodder crop; the rotting down of farmyard manure; and the carrying on of dairy farming with cows the production of which is not determined by modern methods.

It is many years since it became generally understood that the thick planting of corn not only wasted seed, but resulted in a crop of low feeding value. It has long been demonstrated and the information made public that farmyard manure loses value about at the same rate as it loses weight. Still these two practices are permitted to cause heavy losses amongst particularly the class of farmers who can ill afford the waste that is incurred.

Ill advised as these practices are there is perhaps more excuse for them than that of feeding, housing and milking cows that give so little as not to pay their own way in the herd. Testing of cows for production by simple and sure methods has been long carried on in this country, and thousands of herds have been built up to a profitable rate of production. Owners of hundreds of thousands of cows and thousands of herds have not taken advantage of this service, and are each year helping to depress the farming industry. According to the latest issued report of the Federal Minister of Agriculture thirty thousand cows, representing three thousand three hundred herds, were tested, within the past fiscal year under the Live Stock Branch cow testing policy, which operates in all the provinces except British Columbia, Saskatchewan and Ontario. That is to say, of the more than 1,800,000 cows, trouble was taken to weigh and test the milk of only 30,000 during sufficient of their lactation period to indicate the returns they were making through the milk-pail. Of this number 13,180 cows averaged 5,810 pounds of milk, containing 230.77 pounds of butterfat; 2,350 cows gave 300 pounds of butterfat and upwards. Three of the herds averaged more than 500 pounds of butterfat and 28 averaged 400 per cow.

The discovery by testing of the actual production of cows usually leads to several advanced steps in farming practice. The unprofitable producers are no longer maintained in the herd, and the better cows are given greater care. More suitable and heavier yielding feeds are grown, and improvement by the use of better sires is at once commenced.

To assist farmers in having their herds tested upwards of twenty dairy promoters are employed by the Federal Department of Agriculture in encouraging and helping in the testing and recording of herds within cow testing associations of which there were 264 operating in the provinces of Alberta, Manitoba, Quebec and the three maritime provinces. The Live Stock Branch at Ottawa is ready to assist and direct dairy farmers in utilizing modern methods in determining whether or not the cows are producing milk in profitable quantities.

How Aviators Could Withstand Altitude

Scientist Advises Breathing Oxygen For Hour Before Ascent

Airplane pilots could rise to altitudes of fifty thousand feet, nearly ten miles, without danger of death from the rigorous experience if the nitrogen gas in their bodies is expelled before they leave earth by breathing oxygen for one hour before the ascent. Sir Leonard Hill, the eminent British physiologist, so concludes in a communication to the British scientific journal, Nature, as the result of experiments on animals under low pressure conditions.

Mrs. Smith (showing portrait of herself on her mother's arm): "This is how I looked twenty years ago."

Guest: "Wonderful! And who is the baby on your arm?"

Although there is only one lawyer in Canada for every 1,600 people, there is one lawyer in the House of Commons for every four members of other callings.

We are celebrating our maid's jubilee today."

"Has she been with you 25 years?"

"No, she is the 25th we have had this year."—Vart Hem, Stockholm.

Big Game Hunters Travel By Airplane

Parties Being Organized In Europe For Trips To Africa

Expeditions are now being organized in which big-game hunters, by travelling to and from Africa by air, save weeks as compared with surface transport. Nairobi, in the heart of the big-game country, is only seven days from London by the regular air route.

Hitherto the exigencies of time, owing to the length of the journeys involved, have limited sport in Africa to the leisured few. But the speed of the African air-mail now solves the problem of the modern sportsman who needs to reach, and return from, the big game lands as quickly as possible.

Speed is not the only advantage of the airway when traversing Africa. It also affords splendid views of wild life from the air. Recently, for example, during a flight from Cairo to Uganda, the King of the Belgians obtained, along the sections from Wadi Halfa to Malakal, some magnificent views of big-game in natural surroundings. From the windows of his air salon he saw buffalo, giraffe, and herds of elephants numbering nearly 1,000 animals; and it is interesting to note that on this occasion, though the pilot steered low over the elephants to afford the King the clearest view, they did not stampede or take fright, being apparently undisturbed by the passage of the aircraft above.

Rudder Travels By Truck

"Berengaria's" 55-Ton Tail Taken North For Repairs

One of the queerest travellers that has ever taken the road from Southampton to Darlington was the 55-ton rudder of the "Berengaria." This tail of the mighty liner had to go north for repairs. It was too heavy and unwieldy for any British railway system, so "Kathleen Mavoureen," the world's largest lorry, took the 55 tons of rudder upon her 10 wheels and made a gallant progress from the great Hampshire port to the grimy iron district of the north.

Police and road scouts were busy the whole 200 miles of road warning motorists what they must expect if they should meet the mighty traveller on narrow stretches. The great lorry was greeted with cheers in many a village as she passed through doing a stolid eight miles an hour. The only check of the journey was encountered just outside the village of Wentbridge on the Great North Road, where there was a breakdown through engine trouble, and something like 12 hours were lost. The journey altogether occupied six days and 16 hours, and the lorry consumed nearly 300 gallons of gasoline.

Persistent Advertising

Little To Be Gained By Spasmodic Attempt At Publicity

Advertisers of little experience expect too many results too quickly, according to A. J. Denne, advertising counsel of Toronto.

"They take the view," he said, "that if advertising is a seed, something must show above the ground the day after the seed is planted." If advertising is a stimulant, then it must agitate the heart and limbs into action immediately and violently."

Mr. Denne pointed out that time is a great essential in advertising and that a campaign must be put forward persistently and patiently if results are to be expected.

"It is not natural for two days of sunshine in March to melt all the snows of winter," he said.

Impatience he pointed out, is the cause of many spoiled advertising campaigns, which are called off before they have had a real chance to take root.

Nothing But Luck

The flying field was crowded at the finish of the air race, and great was the astonishment when the winning 'plane descended and out of it stepped an unknown amateur. The representatives of the press surged forward.

"Wonderful achievement"; the spokesman shouted. "You've broken all records for a non-stop flight. How did you do it?"

"Well, to tell you the truth," the rank outsider answered modestly, "I think luck had something to do with it. I didn't find out until about five minutes ago how to stop the darned thing."

Wiper Easy To Replace

When the rubber in a windshield wiper has rotted, it can be replaced with a piece cut from an old inner tube, says Popular Mechanics Magazine. It will, of course, be necessary to trim the edge perfectly straight so that it projects about 3-32 inch. This can be done by using a straight-edge and a sharp knife.

British boys of today are taller than those of the previous generation.

Romance Of Mining

Expert Profited By Refusal Of Company To Buy Claim

Most of the mineral wealth of Australia comes from a small district, the Golden Mile, near Koolgardie, and the way in which it was discovered is one of the romances of mining.

Thirty-nine years ago a London company sent an expert, W. A. Mercer, to examine a piece of land in Australia. It proved to be valueless, but when he was on the point of leaving he heard of another plot some miles away. This he found to be extraordinarily rich. It consisted of eighteen acres, and the price was $25,000. The London company refused to provide the money, so Mercer formed a small company, which made the purchase.

The claim consisted of a great mass of rock, and since its purchase it has earned the name of the Treasure House. Soon after a shaft had been sunk it was realized that it contained untold gold. In twenty years $32,500,000 worth of gold has been taken from the claim which the company refused to buy for $25,000, and more than $15,000,000 has been paid in dividends to shareholders.

The mine has transformed what was a desert into one of the busiest centres in Australia. There was once no water there; now water is brought from Perth by a pipe-line 370 miles in length.—Tit-Bits.

Explorers Find New Varieties Of Fish

Expedition To Little-Known Islands Bring Back Rare Specimens

Four-eyed fish that use one pair of eyes beneath the water and another above and fat red fish with eyes that shine in the dark were among the trophies brought back by the Templeton Crocker Expedition from the little-known islands off Mexico and Central America.

Some 400 specimens of birds also were obtained, and mammals, plants, insects and marine life collected by the expedition which travelled 9,000 miles.

Fifty gallon jars closely packed with marine life dredged from the sea at depths from six to 200 fathoms were brought back. These, it is claimed, contain many rarities.

The four-eyed fish captured is declared to be found only in a shallow Honduras river. With double eyes, it swims just below the surface, one pair of eyes scanning the air for insects and the other set watching the bottom for food.

New Type Of Machine Gun

So Light That Ten May Be Mounted On Wings Of Aeroplane

A machine gun so light in weight that 10 may be mounted on the wings of an aeroplane, has been announced by John Browning. The new weapon can fire 1,200 bullets per minute, says Popular Mechanics Magazine. Equipped with 10 such guns, pilots of fighting planes can turn a stream of 12,000 bullets per minute on an enemy aircraft. The "shotgun" effect is the result of the 10 guns firing simultaneously, and exact accuracy is unnecessary, since the battery covers such a wide field. The new gun is designed as the .30-calibre aircraft model.

Time To Complain

Jones found an extra $5 bill in his pay envelope one Saturday, but the next pay day his envelope was $5 short, so he registered a kick.

"You didn't say anything when you were given a fiver too much," said the cashier.

"No," returned Jones. "I can overlook one mistake, but when it comes to two mistakes, it's time I spoke about it."

Dorothy—"How long is it to my birthday?"

Mother—"Not very long, dear."

Dorothy—"Well, is it time for me to begin to be a good girl?"

WHAT NEW YORK IS WEARING

Illustrated Dressmaking Lesson Furnished With Every Pattern

Here's something extremely smart in a brown plaided woollen for the little school girl of 6, 8, 10 and 12 years.

It's the new coat type exactly like the grown-ups with a big boy collar of white pique. The little artist's tie is vivid red crepe de chine to match the leather belt.

It's easily made! It's a one-piece affair with an inset inverted plait at the front to give ample hem fulness.

Style No. 3180 requires 2 yards of 39-inch material with ⅞ yard of 35-inch contrasting and 2 yards of binding for the 8-year size.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Cost Of High Schools

Free Secondary Education For Everybody Is Becoming Expensive

The outcry against the unprecedented cost of high school increases day by day, and the attack centres pretty much around one point.

The question at issue is this, says a writer in Toronto Saturday Night: "Can we afford free secondary education for everybody? As long as only a small proportion of children presented themselves for it the question did not rise. Now, with half of all children appearing in high school—very much more than half in cities—it forces itself upon us. If all of the youth attempting it were capable of benefiting from it it might be a good investment. This may be something of what a leading English educationist has in mind when he tells us that in the old land they cannot afford it, neither can we, but we do not realize it."—Sault Daily Star.

Canes are again in vogue in England.

Modern proverb: "Presents make the heart grow fonder."

Talkies are to be produced in Spain.

The Two Extremes

Flights Toward Stratosphere Matched By Dives to Sea Floor

Analogous to Professor Auguste Piccard's flights toward the stratosphere above Switzerland are Dr. William Beebe's dives toward the bottom of the sea off Bermuda. Dr. Beebe, field agent for the New York Zoological Society, uses a bathysphere, 4½ feet quartz-windowed steel ball with walls 1½ inches thick. Its purpose is to withstand the pressure of deep sea water, where as Professor Piccard's 7-foot aluminum gondola was constructed to prevent its explosion in rarefied air.

Fortnight ago Dr. Beebe lowered his bathysphere empty to 3,000 feet at the end of a stout cable. When he hauled it back to the deck of his tug "Freedom," the bathysphere was full of water under pressure such that it blew the lid's bolt across the deck after it was loosened. There was a tiny leak in a port gasket. Any surface creature inside would have been crushed to jelly.

Dr. Beebe made sure that the bathysphere was water-tight when he and Otis Barton, builder of the diving ball, took a deep ride a few weeks ago. Dr. Beebe had descended 1,426 feet two years ago, a record, but he has now broken this.

An intelligent publicist, he had arranged for a radio broadcast of his descent. A telephone line ran between the bathysphere and the tug "Freedom." So the world heard a description which while less Shelleyesque than Professor Piccard's stratosphere exuberances ran in the same strain ecstasy.

The water pressure on the bathysphere was about 4,800 tons; the temperature 50 degrees Fahrenheit within. Dr. Beebe ordered the sphere raised to the "Freedom's" deck, popped out with: "The scientific results are most satisfactory."

To Test Durum Wheat

Will Determine Western Areas Most Suitable For Grain For Macaroni

A study of varities of wheat and the location of areas in western Canada most suitable to the production of high quality macaroni will soon be underway at an experimental laboratory being installed by the National Research Council at the Manitoba Agricultural College. The plant will be in operation within the next few weeks.

This was revealed when Dr. W. F. Geddes, of the Manitoba Agricultural College reported progress on laboratory installation to a meeting of the associate committee on grain research of the National Research Council.

The macaroni laboratory, Dr. Geddes said, will undertake quality studies on Durum wheat for the prairie provinces.

Arrangements are being made to secure samples of Durum wheat from the chief importing and exporting countries of the world, when their quality will be investigated.

By this means, Dr. Geddes said, definite information will be secured as to the competition which Canadian grown Durum will have to meet on world markets.

One For the Irish

"You know, Pat," said the Scot, "some time ago we dug the ruins of a fourteenth century castle in Scotland and found a lot of wire. This proves that telegraphs and telephones were used in Scotland already in the fourteenth century."

"Well," answered Pat, "in Ireland we made a more wonderful discovery. We dug up a prehistoric dwelling and found no wire at all. That proves that our Irish ancestors in prehistoric times used wireless."

Wood for walking sticks and umbrellas is grown like corn or oats. Small saplings are planted and are cut in about four years.

Spanish Apiarist Has Evolved A Plan To Greatly Increase The Production Of Honey

Working on the theory that the busy bee still can be kept busier, Don Jose Rovira Mari has invented a hive which may revolutionize the bee industry.

Senor Rovira is an experienced beekeeper at Benifayo, in Valencia. After perfecting his new device and becoming convinced that the productivity of the bees can in some cases be increased 100 per cent. he has demonstrated his apparatus at the mureum of natural sciences, Madrid, where it created a good impression.

The basic principle of the new hive is the simplification of the bee's labors so that it can dedicate more of its energy toward the business of making honey. The apparatus is known as the "fountain-hive," for to extract honey, all that is necessary is to perform a simple operation with a device of Rovira's invention, and then open a spout through which the honey flows out.

All of this is accomplished without disturbing the bees, and in this manner all the complicated procedure of the old style beekeeping is eliminated.

"Furthermore," he explained, "the 'fountain-hive' enables us to incite the bees to more work. In the springtime, when there is plenty of nectar in the flowers, their capacity for making honey is greatly increased. In order to utilize this potential capacity all one has to do is drain off the honey, and they will then begin to produce more.

"And, in view of the fact that the honeycomb is practically undisturbed, the energies which the bee would otherwise have to be constantly making to create a new comb are economized, and can be devoted to the task of producing more honey. Or, in the case of the bee raiser who buys manufactured combs, the new process obviates the necessity for purchasing them.

"Of course, as things are at present, many persons desire to buy their honey in the comb, in order to be sure of its purity. But when the public learns that the product of the 'fountain-hive' is guaranteed to be extracted without the necessity of having to touch the comb at all or of frightening the bees away by smoke or some other method, and instead is obtained by simply turning a key and letting it run out in all its purity, without any pollen or other matter, they will be reassured of its quality.

"There are many incidental advantages of the new invention," Rovira added, "one of them beinng that there is no necessity for ever infuriating the bees. When, under the present system, the beekeeper goes out to rob the bees, he is well protected by a net around his face, and gloves—but the infuriated bees go as far as two kilometres away and sting other persons, who do not happen to have a net around their faces. Under the new system they are never molested, and hence are perfectly happy—and for that reason, they produce more."

Rovira has made a life study of bees. He long ago became convinced that they are more intelligent than man, and that man, in utilizing the activities of the bee, was not getting as much results as might be accomplished, for the very fact that certain rather unnatural elements were adopted by the bee industry.

Russia's Five-Year Plan Near Failure

Production Dropped Off This Year Instead Of Increasing

Complete production figures for the first seven months of the current year indicate practically the end of the Soviet hope to complete the five-year program for basic industries like ferrous metals, coal, transportation and agriculture in four years.

The production figures showed that industry gained 17 per cent. over the corresponding seven months of 1931, but this was less than half of the 36 per cent. growth set for the year with the view of completing the five-year program.

Industrial growth may if sharp improvement is achieved in the final spurt of 1932, reach 30 or 22 per cent., which is about the average for recent years. But this would be still far short of the soviet goal and leave the "platiletka" unfinished.

The most disturbing element in the statistical picture for the seven months of 1932 is the fact that the output in leading industries has been declining rather than increasing. After a fairly good start in January and February, production slumped gradually as food and transport difficulties pile up.

Generator Used Again After Fifty Years

First To Furnish Commercial Power For Electric Light

Although the hand of the master inventor was not there to help, Old Jumbo No. 9, the first generator which ever furnished commercial power for electric light, came to life recently at Henry Ford's Greenfield Village. The occasion was the dedication in New York of a plaque at the site of the old Pearl St. station which housed the generator 50 years ago.

As the old generator, rebuilt and housed in the Ford museum, swung into action a description of the scene was conveyed to the New York dedicatory group by radio.

Alex Dow, now president of the Detroit Edison Company, handled the valve wheel. He recalled that when Thomas a. Edison first turned on the generator and provided electric light to 400 New York homes, he was studying under a flickering lamp light in Liverpool. As Dow turned the valve, the same one Edison had handled a half century ago, the old generator, sire to all the great power plants of today, leaped into action and current went through the circuits to light a dozen old-fashioned light bulbs.

Saskatchewan Feeder Show

George L. Dewey Is Re-Elected As President

George L. Dewey was re-elected president of the Saskatchewan Feeder Show at the annual meeting held in the Grant Hall Hotel, Moose Jaw.

The directors showed its confidence in the executive by unanimously re-electing the entire slate as follows: Honorary presidents, Hon. W. Weir, Federal Minister of Agriculture, and Hon. W. C. Buckle, Provincial Minister of Agriculture; honorary vice-president, J. G. Robertson, provincial livestock commissioner; vice-president, M. P. Tysdal; managing secretary-treasurer, Edward Evans, general manager Co-Operative Stockyards; immediate past president, W. D. McIntyre. The directors will be appointed at a meeting of the executive.

The Only True Measure

What a Man Is, Not What He Has, Estimates Worth

Not what a man has, but what a man is, is the true measure of a man's worth. It is his properties rather than his property, by which he is to be estimated. And the way a man shows what he is, and what are his properties, is by his chosen activities in life. His tastes and their gratifying, his desires and their pursuing, are a resultant evidence of a man's character. "Be aware, therefore," says Marcus Aurelius, "that every man is worth just so much as the things are worth about which he busies himself."

The Other Side

As the Ottawa Journal remarks, the subject of dogs is a "tickliah one." To most of us, on occasion, dogs are a nuisance, but there is another side to it. There is the boy-and-his-dog side; the nondescript little animal, a nuisance to some, perhaps, but to the boy a companion to be fought for and protected. Let us not forget the boy's side of the question; to him it means a very great deal.

Father—And you think you will be able to give my daughter all she wants?

Suitor—Yes, sir; she says she only wants me.

One ton of wood pulp will make three square feet of paper.

Share Renting Of Farms

Helpful Circular Prepared At Ontario Agricultural College

An excellent circular containing a brief but comprehensive discussion of the principles and conditions of share renting of farms has just been prepared by Department of Agricultural Economics at the Ontario Agricultural College.

Anyone interested may secure a copy by writing to that department.

Two main plans of rental are set forth, namely crop-share renting and live-stock-and-crop-share renting. Many modifications of these are suggested and discussed. Tables are given showing satisfactory proportional division of expenditures and returns as between landlord and tenant, under varying conditions of soil fertility, buildings and equipment, and market facilities. The circular also contains a form of agreement which should prove very useful, both to tenants and to those who have farms to rent, in helping to avoid some of the pitfalls common with loosely stated or with unwritten agreements.

Bardfield farmhouse, 300 years old, near Brentwood, England, was destroyed by fire recently.

"The lady complains that you showed her no courtesy."

"But, sir, I chewed her eyeglass we had in the ship—[illegible] Connection

IS THE UNITED STATES PRESIDENT AN ENGLISHMAN?

It has been disclosed that not long ago a great deal of research was made by officials in the Town Clerk's Department of the Town of Kensington, England, to find out whether or not President Hoover was ever a British subject. The period of the search covered the years between and including 1911 and 1915. The inquiries related to the United States' President, who many years ago lived at the "Red House," in Hornton Street, Kensington. No official information has been given concerning the result of the search. Above is a picture of the entrance to "Red House," while inset is a good photograph of President Hoover.

Bentley News

Miss Jannett Brown, sister of Miss M. Brown, matron of the Bentley Hospital, and Mr. P. V. Abbott, of Edmonton, spent the week end in Bentley.

Mr. Wyatt is a patient in the hospital. His many friends will be glad to know he is progressing favorably, and will soon be around again.

Born: at the Hospital, on Nov. 3, to Mr. and Mrs. H. Iddings, a son.

Mr. and Miss Lily Sharpe, of Lacombe, were visitors at the hospital on Sunday. They were very much pleased with the new hospital, and were high in their praise of all who helped to make the new hospital a success.

Many of Bentley's young folks attended the dance at Lockhart on Friday night last.

Miss Jean Marshall won the prize for the best dressed person in the Chautauqua parade (being dressed as a bold, bad pirate). She wins the season ticket to the Chautauqua.

Coming to the hall on Monday, Nov. 1st, Harold Lloyd in "Movie Crazy". This is Harold's latest picture, and surpasses anything he has done before. This show is well worth seeing. Everybody come.

The Chautauqua at Bentley was well patronized this season, considering the hard times. The committee are sure they will break even.

MUNICIPAL CONFERENCE

Mr. A. Soutter, Assistant Deputy Minister and Mr. Joseph Renshaw, Inspector of the Department of Agriculture, were speakers at a largely attended conference of surrounding municipalities held in Lacombe, on Tuesday evening. Called for the purpose of obtaining all possible information as to the benefits or otherwise of larger municipal units, the gathering listened attentively to the facts and figures as presented by the speakers, and the question forum which followed, brought out a fund of information regarding the management of schools, roads and municipal administration under the proposed new scheme. Enlargement of this would include eight municipalities or a territory extending 130 miles East and West and 30 miles North and South.

The meeting ,not being entirely satisfied that the scheme would work out satisfactorily, passed the following resolution: "That this meeting go on record as being opposed to the system of enlarged municipal units as outlined at this meeting." Representatives were present from Lamerton 298, Blindman 430; Lorne 400, Crown 399 and an unorganized territory in the West.

ST. ANDREW'S CHURCH

Solo "When Jesus Came," words by Rev. G. A. Studdert-Kennedy. Music by, Leon Abbott Haffmeister. By Miss K. Walters.

Young People's Meeting immediately after church.

Bible Discussion Group meets Wednesday evening at 8:30. Everyone welcome. John 5; Co-operation of the Father and Son, is the next subject.

The W.M.S. will meet on Tuesday, Nov. 15th at 3:00 p.m. at the home of Mrs. J. N. B. MacDonald if good weather prevails, otherwise with Mrs. W. C. Sweet.

On Friday evening, December 2nd, the Young Women's Auxiliary will held their annual bazaar in the Church Hall.

The Y.W.A. will meet at the home of Mrs. G. E. DeLong on Tuesday evening, Nov. 15th.

A big Minstrel Show is looming on the horizon. Watch for it.

On Thursday, November 17th a concert will be held by the Senior and Junior choirs in aid of the Church Fund. Over forty members will take part in thtis concert. Mrs. F. M. Reed will be Choral accompanist and Mr. L. D. Wright, Musical Director. The Choir will be assisted by the Lacombe Concert Orchestra. Admission, Adults 35c.; High School Students 25c.; Children 15c.

DEMOCRATS SWEEP INTO POWER IN U.S. WITH OVERWHELMING MAJORITY

Franklin Delano Roosevelt was swept in to power as President of the United States with a tremendous majority. Latest reports place the Democrats over 4,000,000 ahead of the republicans. Popular vote does not elect; a total of at least 266 electoral votes is necessary to elect. The summary of electoral votes to date give Roosevelt 472, Hoover 40. Roosevelt is practically sure of the greatest electoral majority in the history of the U.S.

MAYOR KNOTT ADMINISTERS CRUSHING DEFEAT TO CLARKE

Despite the unfair and unjust campaign waged against him, by a certain secret society in Edmonton, Mayor Knott proved decisively that the average Edmonton citizen is averse to religious and racial prejudice and bigotry by defeating Joe Clarke by an overwhelming majority.

Mayor Knott took the lead early and held it easily, soon piling up a lead over his two opponents to assure an easy victory. Mayor Knott took the largest number of votes in Clarke's own poll and also polled heavily in the residential areas.

The Aldermanic returns place the following men in the positions of Aldermen. Gibbs, Fry, East, Ogilvie, McCreath. The same as last year.

In the Elections for the School Board, the same slate of officers as last year was returned to power.

BURGLAR CAUGHT IN CALGARY

Caught as he was leaving one of Jenkin's Groceterias in Calgary, via a back window a burglar was brought up for trial before Magistrate Scott in Calgary and sentenced to nine months in jail. While in custody he confessed that he broke into Jenkin's Groceteria at Lacombe. He was sentenced to nine months on this charge, sentences to run concurrently.

LUST WILL DEFEND HIS WESTERN TITLE AT STETTLER

Emil Lust, Welterweight champion of Western Canada will defend his title against Pete Holm of Stettler on Monday, November 14th, in the Stettler Arena. Fans will remember Holm when he fought at Lacombe last month and won an easy victory over his opponent. Since the beginning of his ring career Holm has never suffered a defeat and so has earned he right to challenge Lust for the Championship. Lust on the other hand has held the championship for a number of years, and so has proven himself a real title holder. Both boys are fast and furious and are right up in the art of ringcraft. Besides the main bout, the Stettler Promoters have arranged a real semi-final bout between Frank Walcut and Baden Whiteaides, of Penhold, a Middleweight Champion. Added to the above two head liners bouts are other five of the finest preliminaries ever presented, in the persons of Prey Mosley, Ponoka, Dick Whitesides, Penhold; Skinny Welsh, Erskine, John Wilkinson, Alix; Don Wells, Red Deer, Warner Heisig, Halkirk; George Truelson, Stettler; Young Moody, Big Valley. Referee, Alex Wilson, of Calgary, Ex-Heavyweight Champion of Western Canada. Ringside seats can be purchased from Jim Toller, Lacombe, Phone 53. First bout starts at 8:30 p.m.

SAFEWAY STORES

Prices Effective Saturday and Monday, Nov. 12 and 14 Incl.

At Your Safeway Store

Have not you noticed that most clever people are inquisitive—that they want to know, that they want to see?
Their traits are plain to Safeway men every day. They come to their Safeway Store, wander about from display to display, see all there is to see. Then they serve themselves with this, with that, certain that their choice is best, certain that the value is all it ought to be.
Clever Shopping is Self-Serve shopping.

Dated at Bentley, Alberta, this 21st day of September, 1932.

H. C. Hopkins,
Secretary-Treasurer

FAMILIARITY BREEDS CONTEMPT OF GASOLINE

For the truth is that this familiar stuff is worthy of a great deal of respect that it does not get from the layman. The average man sees and handles it so often that he thinks nothing of it and the fellow who would tread gently in the presence of dynamite or have a fit at the sight of a careless workman smoking a pipe on a keg of blasting powder, is blithely careless in his treatment of a substance that is infinitely more dangerous than either of those.

Government experts have fixed the explosive power of gasoline at sixty-three times that of dynamite, and it seems to me that if more people realized this they would not be so reckless in their contacts with it—and we'd have much less trouble than we do. At the present time we are losing 2,500 lives in the U.S. Annually from the misshandling of inflammable liquids and this factor which did not appear among the first five common causes of fires in 1910, rated second on the list in New York City last year with nearly 6000 blazes to its credit. It is high time we did something about it, and, unquestionably, the first step is to find out something about gasoline. Do not take a chance, let Rainbow Cleaners do your dry cleaning.

Has Solved One Problem

Soap In Tubes Now Available For Visitors To Europe

W. L. Clark, in an article in the Border Cities Star, says if you have travelled on the European continent, you have probably been caught soapless in the hotels. As all Canadian and American hotels, and many of the English ones, have soap in the bathrooms as a matter of course it comes as a surprise to find you must supply your own soap in the continental hostels.

Often have we wondered why someone did not do something about this lack of soap. The proprietress of an English beauty parlor has also thought about it but she is practical. She has invented a concentrated soap that is sold in tubes like shaving cream and toothpaste. Now the continental traveller can buy a couple of tubes of soap before leaving the British Isles and so guard against the parsimony of the hotels.

We hope the woman who thought of the new idea cleans up a neat profit. We'll be a customer if we ever have the good fortune to go to Europe again.

Writer Claims Russian Women Badly Treated

Victims Of Militarism and Soviet Works Them Like Serfs

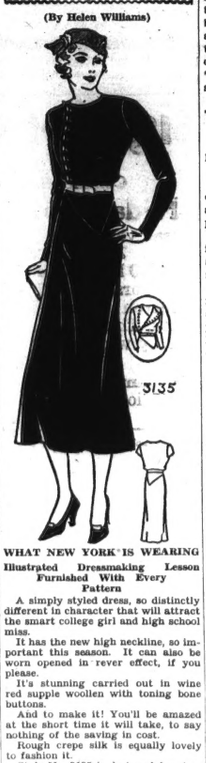

The Soviet woman, says an American writer just returned from a year in Russia, is the victim of the "greatest trick in history."

Paulo Leclerc gave her views based on a year's travels, most of it without guides. She said she left dummy luggage in hotel rooms where she registered and went out alone to see conditions for herself.

"The whole system of civilisation has crashed about the heads of Russia's women," she said. "They are the victims of the greatest trick in history, the tragic victims of militarism, the most maligned and misprized lot, biologically and spiritually, of any women on earth. They exist wretchedly under a system of cajolery and coercion, bereft of all feminine consideration, and worked like serfs by the government."

Admiralty Honours Carmania's Memory

Famous Action Of Cunard Liner "Carmania" and German "Cap Trafalgar"

An echo of the famous action between the Cunard liner "Carmania" and the German ship "Cap Trafalgar" in the South Atlantic during the war, was provided when a letter was received recently from the permanent secretary of the Admiralty to the Cunard Line.

The "Carmania" recently passed out of the Cunard service, and is at present being broken up at Blyth.

The letter from the Admiralty, which is signed by Sir Oswyn Murray, the permanent secretary, runs:

"On the occasion of the recent passing out of the service, and the subsequent breaking up of the S.S. Carmania, I am commissioned by my Lords Commissioners of the Admiralty to convey their appreciation of the excellent war service of this vessel, and more especially of her gallant action with the 'Cap Trafalgar.'

"It will be recalled that the 'Carmania' located the 'Cap Trafalgar' in the South Atlantic on the 14th September, 1914, and that in the subsequent action both ships withheld their fire until the range had closed to 7,500 yards.

"In spite of the withering fire the ships did not begin to turn away till the range had closed to 3,500 yards, when the 'Cap Trafalgar' had her deck steam pipes cut, was ablaze forward, and was listing to starboard.

"In the 'Carmania,' too, a fierce fire had broken out, but she was able to hold it in check, and the wind was aft, by keeping on the enemy's port quarter, and pressed on the action, which resolved itself into a stern chase of the faster 'Cap Trafalgar.'

"Although the 'Cap Trafalgar' still possessed enough speed to get out of range, she was already doomed on account of the destructive fire poured into her during the short range action, and she sank less than two hours after the first gun had been fired.

"That this was not accomplished without the exercise of a discipline and gallantry worthy of the highest traditions of the British Navy is sufficiently indicated by the fact that after the action, the 'Carmania' was found to have been hit by no fewer than 79 shells mostly in her upper works.

"In the opinion of My Lords, this, the first action, was fought between two armed merchant cruisers, reflected the highest credit on the 'Carmania,' her officers, and crew, and they feel that the occasion of the breaking up of the ship should not be allowed to pass without conveying this expression of their appreciation of her very gallant action with the 'Cap Trafalgar' and her other war services."

Thief Trainers Are Active In London

Perfection Of Skill They Have To Develop Is Amazing

Like Fagin, whom Dickens described in "Oliver Twist," thief-trainers still keep their academies for young pickpockets in the London slums.

There is a family of seven children in one of the many squalid dwellings, all known to be in careful training for some department of crime.

The perfection of skill they are required to develop is astonishing. If a child is not able to pick his father's pocket of a handkerchief successfully before he is four years old, he is cursed.

A woman, Hilda Martin, has spent thirty years as a social welfare worker and agent for Scotland Yard spying out the dens of thieves in the city's slums. She set up a carpenter shop to teach the sons of thieves a useful occupation. They all proved highly adroit.

"They had wonderful hands," she said. "Trained as pickpockets they were far too expert to handle anything clumsily. They made beautiful carpenters—while they stuck to it."

The Fagins of today, however, concentrate more on car-stealing, smash-and-grab raids and burglary than on such small endeavour as pocket-picking.

Affected Immense Area

That China's flood last year affected an agricultural population equivalent to the number of farmers in the entire United States, has just been reported by the University of Nanking, which conducted a survey in connection with the national flood commission of China.

Letters have been sent by rocket from the top of an Austrian mountain to a village one mile below.

Monks are buying mansions in Engonce occupied by the rich.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile —No Calomel necessary

For you to feel healthy and happy, your liver must pour two pounds of liquid bile into your bowels every day. Without that bile, trouble starts. Poor digestion. Slow elimination. Poisons in the body. General wretchedness.

How can you expect to clear up a situation like this completely with mere bowel-moving salts, oil, mineral water, laxative candy or chewing gum, or roughage? They don't wake up your liver.

You need Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure results. Ask for them by name. Refuse substitutes. 25c, at all druggists.

Bread Provides Energy

It Is Cheapest and Best Food Material Available

Bread is man's best food.

Bread supplies the most important need of the body—energy.

Good bread is 100 per cent. digestable.

More calories can be obtained in the form of bread than in the form of any other ready-to-serve food.

The diet of the people of the United States is only thirty per cent. bread, that of England fifty per cent., while France leads with a diet of which sixty per cent. is bread.

Bread supplies one-third more energy at one-sixth the cost of meat.

Bread is the most economical of all foods.

Bread will not only supply energy but also material for growth and repair.

It is generally agreed that bread is the most palatable of all foods, because it is the only food that one can eat at every meal, day in and day out, year after year, without tiring. One reason is that a variety of about 50 different kinds of bread now being baked permits wide variation of the menu. The use of different kinds of bread from day to day is recommended by dietitians to please the appetite and to make the meals more interesting.

Good bread more nearly supplies all the nutritive needs of man than any other food. By good bread is meant the kind the best representatives of the baking industry are making.

Bread is the staff of life. It is by no means a source of all the necessary food constituents of a normal diet, but today the role of bread in nutrition is most important since it furnishes about 40 per cent. of our total calories, most of our carbohydrate ration, much of our proteins and roughage, some mineral salts, fat and vitamins.

Bread, next to milk, is the most satisfactory single article of food that is available. It is the most satisfactory form in which cereals can be used, and wheat is the most common grain that is used for bread making.

Bread is essentially a carbohydrate food, although it furnishes a fair proportion of protein and minerals. Wheat flour contains from 8 to 17 per cent. protein and from 65 to 75 per cent. carbohydrate. White bread contains about 35 per cent. water, 53 per cent. carbohydrate, 9 per cent. protein, and one per cent fat. The contents of whole wheat bread and graham bread are very nearly the same, but the carbohydrate and protein of white bread are more digestible than the carbohydrate and protein of either whole wheat or graham bread.

Bread theoretically can be combined with all other foods and in practice usually is so combined. It is the cheapest and best food material available and usually is used to make other more expensive foods go further.—Betty Barclay.

Market Almost Limitless

Canada Will Benefit If Orient Prefers Wheat To Rice

One million bushels, an amount recently shipped to China through Vancouver, will not make a particularly large reduction in the total of wheat held in Canada from a crop of 400,000,000 bushels, but it is, nevertheless, an important shipment because it indicates the possibility in a market that is almost limitless. It is an attractive market that opens up in the Orient because if the people there turn to wheat in preference to rice there may be hundreds of millions instead of single millions of bushels shipped from the West in the course of a few years.

Your pipe and Ogden's Cut Plug... that's a combination without equal for fragrance, sweetness and absolute satisfaction.

OGDEN'S CUT PLUG

Recipes For This Week

(By Betty Barclay)

CRANBERRY AND APPLE PIE

1½ cups crumbled soda crackers.
½ cup butter.
1 cup sugar.
1½ cups cranberries.
1½ cups diced cooking apples.
½ cup water.

Crumble crackers fine and mix with butter and one tablespoon sugar. Press mixture in an even layer against sides and bottom of buttered pie plate. Cook cranberries and apples, water and sugar together until tender. Cool and pour into crackerlined plate. Bake in a hot oven (425 degrees Fahrenheit) 12-15 minutes. Eight-inch pie.

COCONUT AND CARROT MOLD

1½ cups grated raw carrots.
1 can coconut, Southern style.
¾ cup mayonnaise.

Combine carrots, coconut, and mayonnaise. Blend. Pack tightly into individual molds. Chill. Unmold on crisp lettuce. Garnish with additional mayonnaise. Serves 6.

Bird Finds Refuge

Huge Pelican Is Housed At the University Of Saskatchewan

A guest of the poultry department of the University of Saskatchewan is a big live pelican that tried to walk from Quill Lake to Florida. After making 14 miles of the journey on foot the bird tried to "thumb" a ride from Hilt Campbell, of Sutherland, who was down in the Dafoe district.

As Mr. Campbell was not going to Florida, he brought the enormous bird to the biologists at the university, where Dr. L. G. Saunders placed it for present keeping with the poultry department. Some time early in the summer the bird had been shot in the point of one wing and is unable to fly. The pelicans have been moving south for some weeks and this straggler evidently decided when the water crusted over with ice that it was time to make a move. It has a wing spread of over five feet.

An old bachelor says that when a man hasn't enough worry he should marry.

Finest Turkeys Are Produced In Canada

Shippers Look For Good Christmas Market In Great Britain

During the next two months one of the finest crops of turkeys in the long and successful history of turkey raising in Canada will find its way to market. A long and favourable growing season for the young birds has been followed by an abundant grain harvest. As farmers from Prince Edward Island on the east to the coastal region of British Columbia on the west start feeding some of this grain to give the birds the proper proportions of flesh and fat the cool invigorating climate of the Canadian autumn and early winter will give the meat that delectable taste and flavour that is found only in birds produced in Canadian latitudes.

The Canadian turkey season is officially inaugurated on Thanksgiving Day. In 1931 for the first time and again this year Thanksgiving came a month earlier than previously. Turkey growers adjusted their operations to take care of the change, however, and large quantities of early hatched birds were made available for the Thanksgiving trade.

Canada hopes this year to place freshly killed Canadian turkeys for the Christmas trade in the British Isles. The knowledge that Canadian turkeys are unsurpassed in quality and flavour lead Canadian shippers to believe that their product should find a ready market in Britain at Christmas. There is, as well, one other distinct advantage which Canadian turkeys enjoy in export trade. Canada is the only country in the world which offers an official system of quality grading with inspection of shipments before export to make sure that they are equal to the quality represented.

If present plans materialize British consumers will be offered during the Christmas season large framed birds from Canada, well covered with the luscious meat of northern grown turkeys. On the breast of each bird will be a small, attractive sticker showing plainly the grade of the bird according to the Canadian Government standards—red for first grade, blue for second and yellow for third. Consumers soon become accustomed to associating the coloured stickers or tags with birds of the different grades.

Contributions Overdue

Many Latin-American Nations In Arrears To League

The League of Nations is in a badway financially, it was revealed when the proceedings of the recent secret council session were published.

Reporting that only 64 per cent. of the contributions for 1932 had been received up to September 19, Carl Hambro of Norway, a member of the supervisory committee, asked that the true situation be disclosed to the assembly and th all League members.

"If it should be impossible for the assembly and the secretary-general to induce states that have not paid to send their contributions this year, the League will be in a very difficult financial position at the end of the year," he said.

"It may be faced with the fact that in the first two months of next year it will either have to obtain a loan or be incapable of paying its officials."

Nevertheless the League treasurer took a hopeful view, explaining the opinion that the budget would be balanced with the help of a 13 per cent. saving effected on the disarmament conference appropriation.

A number of Latin-American nations are in arrears, Germany is the only large country that is delinquent.

Cow Used For Lectures

Thousands of children in Detroit, automobile capital of the world, saw their first cow recently when "Spot" and her calf, "Frisky," visited 80 of the city's schools. The cow's visit was sponsored by Michigan State College, and included a lecture on feeding and milking.

Mac (riding to the hunt)—"Out of my way, wretch! I'm riding to the hounds!"

Jack: "Give us a lift, gov'nor. I'm going to the dogs myself.

A new material resembling suede is being turned out in 24 colors.

Fish Show In Britain

Prize Pets Travel To London In Thermos Flasks

How can you tell if a fish is really well bred? It is nearly as important in a fish as in a dog that its tail is of the right length, and that it bears it properly. Then there is its shape, color, fins and general appearance.

Such points were all carefully considered by the judges at a great fish show held recently by the British Aquarists Association. Nearly all of 300 enthusiastic fish owners brought their 2,000 pets to be entered.

Because the temperature of the water is the real essential to the well-being of the majority of the fish, they generally travel in thermos flasks, and many were brought over from Paris to London in such containers.

Britain is growing aquarium-minded, and the society grows slowly and steadily. Small flat owners find that fish are by far the most suitable and satisfying pets for the constricted areas.

Tropical varieties are the most popular. Some, scarcely an inch in length, can live comfortably in a pint of water. They are not really delicate; provided that their water is properly warmed and aerated, they are quite happy. Some enthusiasts heat their aquariuus with electric current, but the more usual method is oil heating. Their food consists of live worms and insects, failing which, dried food can be bought for them.—Pearson's Weekly.

From One Potato

One large "mealy" has produced in three summers more than 350 pounds of potatoes for the Lord Mayor of Liverpool. At an agriculture show at Anfield, the Lord Mayor told of his own gardening experience. Three summers ago he bought a nice large potato, cut it up in pieces, leaving an eye for each, and planted his potato patch. Now the potato is ancestor to three and a half hundredweight.

A phonograph has been installed in a London telephone exchange to entertain callers while they are waiting for persons to answer.

-:- Do You Know? -:-

Photograph, Canadian National Railways

The islands in the vicinity of this rock form one of the greatest sea bird sanctuaries of the world.

There is NO ODOR from FISH

or from Vegetables cooked in CANAPAR

Boiled, or steamed, fish comes out firm and solid, swimming in its own juice, when you seal it up in Canapar Cookery Parchment. No fishy odor. No gummy steamer or saucepan to clean out afterwards.

And vegetables are simply delicious. Using Canapar you can cook three at once in the same pot over one burner *turned low*. Canapar acts on them as it does on fish. Retains *all* the mineral salts and flavor.

Fat and juices from meat won't burn if you line your roasting pan with Canapar. No pan-scraping afterwards.

Canapar only costs 25 cents for a large envelope. You can use each sheet repeatedly because it won't absorb odors. Makes a perfect dish cloth because it is silky, strong, and doesn't spread lint.

Special Offer

CANAPAR is made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box. Most grocers, druggists and department stores have Canapar on sale, but if yours hasn't send coupon direct to the makers and we'll give you a new and unique book entitled "Leftovers", containing one hundred recipes as a bonus for your trouble.

Appleford Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25c for which please send me one full size package of *CANAPAR COOKERY PARCHMENT* and your 100 recipes for "Leftovers".

SOUR STOMACH

Made in Canada

● Get rid of all that sourness and gas. End that bilious headache or any sluggishness caused by too much acid. Put the stomach and bowels in good order. Sweeten the whole system with Phillips' Milk of Magnesia. Be sure it is this bottle, with the familiar blue wrapper that tells you it is genuine *Phillips'* Milk of Magnesia. The substitutes are *not* the same, and do *not* get the same results.

ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of "The Splendid Folly," "The Herself Of Her Soul."

Hodder & Stoughton, Ltd., London.

CHAPTER XXXV.—Continued.

"Did she? I expect she told you merely what was the truth. I went to see her because she had assured me that she could stop your marriage with Tormarin—could interfere in some way to prevent it. That was why I went to France. But when she told me her blackguardly scheme—how she had planned and plotted to conceal the fact that Tormarin's wife was alive—and why she had doe it, I would have no hand in anything that followed. I'm no saint" —a brief, ironical smile flitted across his face—"but there are some methods at which even I draw the line."

"So—that was why you stayed away?"

"That was why. I wanted you, Jean —God only knows how I wanted you! —but I couldn't try to force your hand at such a time. I couldn't profit by a damnable scheme like that."

Jean's eye's grew soft as she realized that beneath all the impetuous arrogance and dominant demands of the man's temperament there yet lay something fine and clean and straight —difficult to get at, perhaps, but which could yet rise, in answer to a sense of honor and fairness with which she had not credited him, and take command of his whole nature.

"I'm glad—glad you didn't come, Geoffrey," she said gently. "Glad you —couldn't."

"I don't know that I'm glad about it," he returned with a grim candour. "I simply couldn't do it, and that's all there is to it. But I've come now, Jean. I've come because I want you to give me just the right to look after you. I'm not asking for anything. I only want to serve you—if you'll let me—just to be near you. If Tormarin were free, I would not have come to you again. I know I should have no chance. But he's not free. Does that give me a chance, Jean? If it doesn't, I'll take myself off—I'll never bother you again. I'll try Africa—big game shooting"—with a short laugh. "But if it does——"

He paused and waited for her answer. The intensity of longing in his eyes was the sole indication of the emotion that stirred within him—an emotion held in check by a stern self-control that seemed to Jean to be part of this new, changed lover of hers. Surely, in the months which had elapsed since she had fled from him on Dartmoor, he had fought with his devils and cast them out!

She held out her hands to him.

"Geoffrey, I'm so sorry—but I'm afraid it doesn't. I wish—I wish I could give you any other answer. But, you see, it isn't marrying—it's love that matters. And all my love is given."

He took her hands in his and held them gently with that strange, new restraint he seemed to have learned.

"I see," he said slowly. Then for a moment his calm wavered. The underlying passion, so strongly held in leash, shook the even tones of his voice. "Tormarin is a lucky man — in spite of everything! I'd give my soul to have what he has—your love, Jean."

His big hands closed round her slight ones and he lifted them to his lips. Then, without another word, he went away, and Jean was left wondering sorrowfully why the love that she did not want was offered her in such full measure, hers to take at will, while the love for which she craved, the love which would have meant the glory and fulfillment of life itself, was denied her— shut away by all the laws of God and Man.

CHAPTER XXXVI.

Reunion

Jean leaned idly against the ancient wall which bounded the stone-paved court at Biernfels and looked down towards the valley below.

Spring was in the air—late comer to this eastern corner of Europe—but, at last, even here the fragrance of fresh growing things was permeating the atmosphere, strips of vivid blue rent the grey skies, and splashes of golden sunshine lay dappled over the shining roofs of the village that nestled in the valley.

But no responsive light had lit itself in Jean's wistful eyes. She was out of tune with the season. Spring and hope go hand in hand, the one symbolical of the other, and the promise of spring-time, the blossom of hope, was dead within her heart—withered almost before it had had time to bud.

The months she had quitted England had sufficed to blunt the keen edge of her pain, but always she was conscious of a dull, unending ache—a corroding sense of the uselessness and emptiness of life.

Yet she had learned to be thankful for even this much respite from the piercing agony of the first few weeks which she had spent at Beirnfels. Whatever the coming years might bring her of relief from pain, or even of some modicum of joy, those weeks when she had suffered the torments of the damned would remain stamped indelibly upon her memory.

During the last days at Charnwood she had been keyed up to a high pitch of endurance by the very magnitude of the renunciation she had made. It seems as though, when the soul strains upwards to the accomplishment of some deed that is almost beyond the power of weak human nature to achieve, there is vouchsafed, for the time being, a merciful oblivion to the immensity of pain involved. A transport of spiritual fervour lifts the martyr beyond any ordinary recognition of the physical fire that burns and cha.s his flesh, and some such ecstasy of sacrifice had supported Jean through the act of abnegation by which she had surrendered her love, and with it her life's happiness, at the foot of the stern altar of Duty.

Afterwards had followed the preparations and bustle of departure, the necessary arrangements to be made and telegraphed to Beirnfels, and finally the long journey across Europe and the hundred and one small details that required settlement before she and Claire were fully installed at Beirnfels and the wheels of the household machinery running smoothly.

But when all this was accomplished, when the need to arrange and plan and make decisions had gone by and her mind was free to concern itself again with her own affairs, then Jean realized the full price of her renunciation.

And she paid it. In days that were an endless procession of anguished hours; in sleepless nights that were a mental and physical torment of unbearable longing such as she had never dreamed of; in tears and in dumb, helpless silences, she paid it. And at last, out of those racked and tortured weeks she emerged into a numbed, listless capacity to pick up once more the torn and mutilated threads of life.

Looking backward, she marvelled at the wonderful patience with which Claire had borne with her, at the selfless way in which she had devoted all her energies to ministering to one who was suffering from heartsickness —that most wearying of all complaints to the sufferer's friends because so difficult of comprehension by those not similarly afflicted.

Nick's "pale gold narcissus!" To Jean, who had clung to her, helped inexpressibly by her tranquil, steadfast, unswerving faith and loving-kindness, it seemed as though the staunch and sturdy oak were a more appropriate metaphor in which to express the soul of Claire.

She heard her now, coming with light steps across the court. She rarely left Jean brooding long alone these days, exercising all her tact and ingenuity to devise some means by which she might distract her thoughts when she could see they had slipped back into the past.

Jean turned to greet her with a faint smile.

"Well, my good angel? Come to rout me out? I suppose"—teasingly—"you want me to ride down to the village and bring back two lemons urgently demanded by the cook?"

Claire laughed a little. Many had been the transparent little devices she had employed to beguile Jean into the saddle, knowing well that once she was on the back of her favorite mare the errand which was the ostensible purpose of the occasion would quite probably be entirely forgotten. But Jean would return from a long ride over the beloved hills and valleys that had been familiar to her from childhood with a faint colour in her pale cheeks and with the shadow in her eyes a little lightened. There is no cure for sickness of the soul like the big, open spaces of the earth and God's clean winds and sunlight.

"No," said Claire, "it's not lemons this time."

"Then what is it?" demanded Jean. "You didn't come out here just to look at the view. There's an air of importance about you."

It was true. Claire wore a little fluttering aspect of excitement. The colour came and went swiftly in her cheeks, and her eyes had a bright, almost dazzled look, while a small anxious frown kept appearing between her pretty brows. She regarded Jean uncertainly.

"Well—yes, it is something," she acknowledged. "I had a letter from Lady Anne this morning."

Commodity prices in Peru are advancing.

For COLDS

"I always use BABY'S OWN TABLETS to break up my baby's colds," writes Mrs. Wilbert Colquhoun, Sturgeon Falls, Ont.

"When I see a cold coming on, it is to BABY'S OWN TABLETS that I turn," writes Mrs. Robert Greenhorn, Philipsville, Ont.

Mothers everywhere report in like vein of the safe, sure results that follow the use of BABY'S OWN TABLETS in treating children's colds, teething troubles, simple fevers, disordered stomach, colic, constipation. 25 cents.

Dr. Williams' 746

BABY'S OWN TABLETS

W. N. U. 1965

● PAIN relieved instantly ●

Aspirin will dispel any pain. No doubt about that. One tablet will prove it. Swallow it. The pain is gone. Relief is as simple as that.

No harmful after-effects from Aspirin. It never depresses the heart, and you need never hesitate to make use of these tablets.

So it is needless to suffer from headache, toothache or neuralgia. The pains of sciatica, lumbago, rheumatism or neuritis can be banished completely in a few moments. Periodical suffering of women can be soothed away; the discomfort of colds can be avoided.

Aspirin tablets have other important uses—all described by the proven directions in each box. Look for that name Aspirin on the box—every time you buy these tablets—and be safe. Don't accept substitutes. "Aspirin" is a trade-mark registered in Canada.

New Discovery By Montreal Doctor

Method May Help Greatly In Diagnosis Of Liver Trouble

Methods of diagnosing diseased conditions of the liver and spleen may be revolutionized by the discovery of Dr. Rudolph Gottlieb, research assistant of McGill University. Dr. Gottlieb has established the feasibility of using thorium to render these organs visible on X-ray plates. Until now the use of thorium for X-ray examination of the liver and spleen has not been encouraged for fear of poisoning the patient. The McGill scientist found thorium could be absorbed into these organs with no ill results. As thorium is opaque to X-rays, the organs make themselves apparent on X-ray photographs. In addition, Dr. Gottlieb found that use of the substance enabled him to obtain visualization of the pulmonary circulation.

Cancer of the liver would make itself known because of the diseased cells would not absorb thorium and the affected area would be lighter on the plate.

According to the Journal of the Canadian Medical Association, in the current issue of which the discovery is made public, success of the method has been established in many tests on human beings. Dr. Gottlieb experimented with rats, and then used the method on himself. Later on the process was used in connection with 14 patients with excellent results.

THE RHYMING OPTIMIST

By Aline Michaelis

A NEW HOUSE

Within a new house promise lies;
Brave promise of a Paradise
Of work and peace and loved one's eyes!

Within a new house, all untried,
New dreams awake and softly glide
From window-nook to chimney-side.

Here tiny children laugh and sing,
And all day long their shrill notes ring,
As sweet as dawn, as fresh as spring.

Here plans and hopes go marching through,
So much for happy hearts to do
Within a little house, all new!

Ah, to be brave and gay again;
To hear once more the summer rain
On bright, new roof and window-pane!

And yet, enough that such glad hours
Can leave in memory matchless dowers
To blossom in a life, like flowers!

Britain Has Surplus

Balance Sheet Shows Improved Position For First Half Of Year

Great Britain's balance sheet position was improved by £14,000,000 during the first half of the present year, according to the latest budget figures of the Chancellor of the Exchequer. Commenting on this a recent issue of the London Sunday Despatch says that it is now practically certain that there will be a balance on the right side at the end of the year.

While revenue for the six months gained £5,000,000, expenditures dropped £9,000,000 in the same period. Mr. Chamberlain's figures show. For the eight months from January to August imports of foreign goods were reduced by £97,000,000, while exports only fell by £26,000,000 leaving £61,-000,000 as a favorable balance of trade.

The position has improved so markedly, the Dispatch states, that the government now proposes to review the emergency economy cuts which it made a year ago, because it feels that, in the hurry, one or two injustices were done.

Some of the civil servants and the police, who were hit rather drastically, will have the blow softened. It is practically certain, says the Dispatch, that the police will not be called on to suffer the second instalment of the cut which is likely to be postponed indefinitely.

Raw Sugar Supply

Empire Countries Supply Canada With Most Of Her Requirements

The overwhelming proportion of Canada's supply of raw sugar has been coming from Empire countries such as the British West Indies, the Fiji Islands, British South Africa and Australia. The British Trade and Navigation report for August shows that the main supply of the United Kingdom is got in foreign countries, in the following order: Cuba, San Domingo, Java and Peru. The eight months import this year was 23,400,-592 cwt. from foreign countries, and 7,480,760 cwt. from Empire countries.

Indicates Better Times

The Toronto Globe says borrowing on insurance policies has tided many a man over the rough going of the past few years and the assurance of a high official in this protective field that there is evident now a movement toward repayment of loans is one of the indications that things are getting a little better.

The oldest known manuscript of the Bible is in the Vatican at Rome.

Cubs of the Black Bear weigh less than a pound.

Villanella is a rustic Italian song without accompaniment.

"Electric Eye" Used To Clock Speeders

Photo-Cells Secreted In Roadway Ring Bells For Police

Modern science has added a new thrill to motoring, the invention of an invisible speed trap, operated by an "electric eye" which grimly and efficiently records the speed of passing cars when there isn't a motorcycle cop for miles around.

The intriguing little gimcrack is already operating, secretly, on an unidentified stretch of the Boston Post Road, leading northeast from New York City, and is producing perfectly splendid results in the way of trapped motorists, according to Orestes H. Caldwell, president of the New York Electrical Society, who revealed its existence at a meeting of the Electrical Association.

Two photocells are secreted in the roadway. Caldwell explained, and when a car passes over those in succession, bells ring in a distant police booth, indicating the elapsed time between points. If this measured interval is too brief, the policeman on duty further along the road orders the car to pull over and gives the driver a ticket regardless of what speed he may be making when actually sighted.

At another town on the Connecticut Post Road great loudspeakers are now installed. Through these the local traffic officer can issue instructions to approaching cars a quarter of a mile away.

Little Helps For This Week

"Speak not evil one of another."—James iv. 2.

"Let all bitterness and wrath and anger, and evil speaking be put away from you, with all malice." —Ephesians iv. 31.

If aught good thou canst not say
Of thy brother, foe, or friend,
Take thou then the silent way.
Lest in word thou shoudst offend.
—Anon.

To recognize with delight all high and generous and beautiful actions; to find joy even in seeing the good qualities of your bitterest opponent, and to admire those qualities even in those with whom you have least sympathy, this is the only spirit which can heal the love of slander and of calumny.—F. W. Robertson.

Princess Sails For Europe

Princess Galitzene, 80, once the owner of a palace in Moscow, now an exile in Paris, sailed from Montreal for Europe, tourist class, on the Cunarder Alaunia. Each year she comes to Canada to visit her son, who has a farm 100 miles west of Edmonton.

There is a type of golfer who will move heaven and earth to improve his score. In most cases it is only earth.

Pipe tobacco is to be manufactured in Vancouver this year from tobacco grown in the Fraser Valley area, British Columbia.

Western man says sweepstakes are demoralising, degenrating, degrading and delusory. We didn't win anything, either.

Graf Zeppelin Makes Record

Cost Of Ten Trips Reduced To Approximately $3.00 Per Mile

In completing ten trips across the Atlantic from Germany to Brazil this season, the Graf Zeppelin has made a record that astonishes even her backers.

Instead of costing almost $50,-000 a crossing, as had been expected, the expenses of the journey have been reduced to $16,100, it is said, or approximately $3 a mile. The present charge for passage is $476, only a third more than steamer fare, while the time of transit is reduced from 12 days to three.

Would Fill the Bill

"Will you marry me, Edna?"

"No, Jim. My ideal man is very different from you. He must be as strong as Hercules, must bear the burden of the day without complaining, must never be cross with me, must never listen to anything that may be said about me."

"I quite understand, Edna. What you want is a deaf and dumb railway porter."

Bees reared in the south and shipped in packages to northern beekeepers are found to become acclimated without difficulty.

Old Legend Revived

Human Skeleton Discovered In Gravel Pit In Ohio

An old legend that two men lost their lives in 1840 while walking through an unexplored forest to New Knoxville, Ohio, has been revived with the finding of a human skeleton in a gravel pit near that town.

According to the story, the men starved to death and their bodies, found months afterward, were buried near the spot where the bones were found.

Area Of Tokyo Increased

Tokyo has become the world's third city, officially absorbing eighty-two suburban towns and villages, and increasing its area sevenfold. Formerly the population was 2,500,000, and the area 31 square miles. Greater ToTkyo has a population of 5,812,000 in 233 square miles, the city united under a single administration.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile —Without Calomel

You are "feeling punk" simply because your liver isn't pouring its daily two pounds of liquid bile into your bowels. Digestion and elimination are both hampered, and your entire system is being poisoned.

What you need is a liver stimulant. Something that goes further than salts, mineral water, oil, laxative candy or chewing gum or roughage which only moves the bowels—ignoring the real cause of trouble, your liver.

Take Carter's Little Liver Pills. Purely vegetable. No harsh calomel (mercury). Safe. Have. Ask for them by name. Refuse substitutes. 25c, at all druggists.

CANADIAN TRADE IS HANDICAPPED

In normal times the lifting of the quarantine at British ports against Canadian cattle would exercise a most stimulating effect on the shipment of animals to Great Britain but the benefit at present is almost completely neutralized by adverse exchange conditions. Removal of the embargo will eliminate the expense of feeding cattle sixty days on the other side and therefore greatly reduce the cost of placing them on the British market. However, the prevailing disparity between the dollar and pound makes the sale of cattle as of wheat a losing proposition at present, as it permits Australia and other competitors with a much depreciated currency to capture the market.

The importance of establishing a stabilized rate of exchange as between the Canadian dollar and the British pound was the subject of discussion at Ottawa yesterday. Hon H. H. Stevens expressed sympathy with the viewpoint of those who are pressing for a reduction of the value of the dollar to the level of pound in order to place Canadian trade on a more equable basis with that of other countries. The minister admitted the government is concerned about an early solution of the problem and he indicated that he hopes a solution will be forthcoming at the world economic conference.

The stern logic of events has placed Canada in a most difficult position. There is much to be said in defence of remaining on the gold standard, but in the face of steadily dwindling prices for wheat and other natural products and the neutralization of the Ottawa Conference agreement benefits by exchange conditions it is evident that drastic action to meet the situation will have to be devised by the Canadian government.

LACOMBE GROWN ONIONS

For some years, consumers in Alberta have had to depend on British Columbia and the Western States for their supplies of onions. It has been demonstrated very convincingly this year that onions can be grown in this part of Alberta of as good or better quality than the B.C. product. Kirk Dix, whose farm is located some sixteen miles northwest of Lacombe, on the shores of Gull Lake, concentrated his farming efforts on the production of onions for the market. Safeway Stores and Jenkin's Groceteria have his products on sale, and people who have tried these onions praise them very highly. For winter use these onions can not be excelled as the variety grown is noted for its keeping qualities. The onions are kiln cured and are large, mature bulbs. As money spent in this district stays at home, it will help everyone if you insist on "Lacombe Grown Onions" the next time you order—besides you will get onions equal to, if not better than onions grown elsewhere.

THE CHURCH OF ENGLAND IN CANADA
